

Art

The Greeks famously used columns in their architecture. There were three types of columns used at different points in history. They are called Doric, Ionic and Corinthian. These columns and artistic style are still used today in modern buildings.

DORIC

IONIC

CORINTHIAN

Drawing Greek Columns.

Also included in the home learning folder is a step by step guide to drawing the Greek columns. Alternatively or also, you can watch the YouTube videos below (only 2 of the columns have videos). Pick one of the columns to draw and then re-watch, pausing the video to draw each stage as you need to.

Ionic Column

Bonus Task! – The Corinthian Base

<https://www.youtube.com/watch?v=y8nmsXbu59s>

Challenge Task

Draw your own Greek temple using several columns and a triangular top.

Inside the triangular top you can either leave it blank or you can add a Greek scene or design using the patterns, or pictures from previous weeks that were used on shields or pottery. Which type of column will you choose and remember to add lots of detail. In the home learning folder is an example of how to draw a Greek column.
