

Trireme - Powerful Ship of War

The Trireme had three banks of oars powered by slaves & criminals.

The prow of the ship was a huge battering ram made of bronze, designed to smash into the sides of other ships.

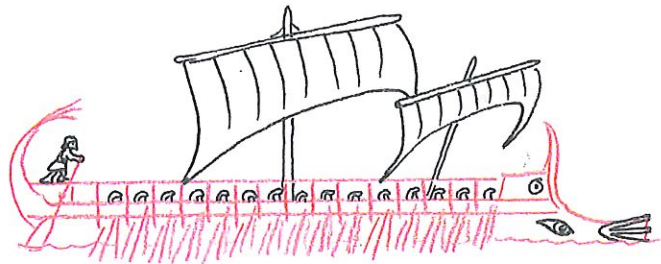

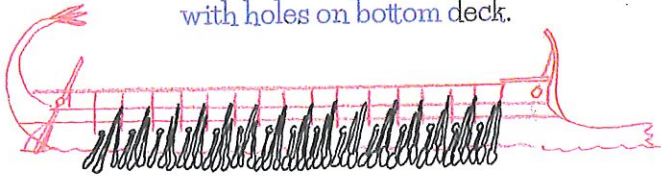

Lightly pencil in the outline of the ship resting on the waves.

Draw the prow, tail & rudder. Then draw the top deck & its supports.

Take time to draw oars for all three decks with holes on bottom deck.

The Watchful Eye is always looking out for trouble. It's also there to frighten the enemy!

Finish drawing the boat by adding masts & sails, the bronze battering ram, the Watchful Eye & members of the crew, including helmsman.
